

I-TEC UPDATE August 2020

2 Corinthians 4:18

So fix our eyes not on what is seen, but on what is unseen. For what is seen is temporary, but what is unseen is eternal.

In today's environment, just as in Biblical times, this is a good reminder for all of us.

Our team at I-TEC is excited about the future as we continue to receive calls from both new ministries as well as ministries that have been serving for many years.

The common thread—MORE POWER = MORE MINISTRY

International Technical
Electric & Construction

I-TEC is pleased to announce the addition of the newest staff family, Robert and Terri Harmon.

Robert joined the U.S. Air Force after high school and worked in various roles. At the end of his military service, he married Terri and together they were challenged to “leave their comfort zones” and take the Gospel to “unreached” people groups. In 1994, they joined New Tribes Mission and moved to Senegal, West Africa. During their years overseas, Robert was a computer consultant and Terri taught children of missionaries. In 2006 they returned to the United States to work at the NTM Missionary Training Center in Missouri. Since that time Robert has been helping missionaries with their solar electric needs and Terri has been teaching missionary candidates.

After serving 26 years in ministry, they began praying about helping other missionary efforts and joined I-TEC in 2020. Robert brings his years of experience of working in I.T. support and research & development to the I-TEC office in Montoursville. Terri does education consulting for various missions and will help out with office projects at I-TEC.

Robert spends much of his “free” time on his ham radio while Terri tries to keep up with their four grown children.

“ For over 40 years we have had the joy of serving Jesus in Congo. We're still inspired at what God has done and look forward to what lies ahead. Our hearts rejoice as we consider the thousands that have come to Christ, the many graduates from the Bible School and the millions who've heard the Gospel through Radio Glory. We believe if God enables us, our most fruitful days are ahead.”

Jim and Nancy Smith
Founders of Laban Ministries Intl.

After hearing Jim and Nancy share the fact that the cost of running their existing diesel generator only allows the radio station to transmit 4 hours a day, we were glad to present a tentative proposal that would provide enough solar and battery power to be on the air 16 hours a day. **This radio station is able to reach approx. 8 Million people with the gospel.**

Please pray for Jim and Nancy Smith as they begin raising approximately \$175,000. for the Solar PowerPac. Any donations you may want to designate towards this project will go directly to I-TEC's cost to build.

Thank you for your continued support of I-TEC and our staff.
